PROFILE

I can describe myself as a results oriented person, constantly checking in with the goal to determine how close or how far away we are and what it will take to make it happen. I find this pressure inspiring and a great motivator for the rest of the team.

I'm a Quality Assurance Engineer with two years of experience working in security industry, providing automated tests for software application and websites.

I've worked with various types of projects and have learning multiple programming languages as well as software testing and debugging.
